Experiment 4A

Insurance Claim Request Form – Basic Fields
Application: Insurance Claim Request & Processing Management

Aim

To design and build an “Insurance Claim Request Form” in Zoho Creator using the 13 Basic Fields available in the Form Builder, so that claim requests from policyholders are collected in a structured digital record before they are assigned to a claims officer.

Fields Used (13 Basic Fields)

Field Type	Field Name	Purpose	Sample Value
Name	Claimant_Name	Full name using First/Last sub-fields	Lakshmi Narayanan
Email	Email_Address	Validated email for claim status updates	lakshmi.n@example.com
Address	Residential_Address	Full residential address with city, state, pincode	7, Temple Street, Tirunelveli, TN, 627001
Phone	Contact_Number	Validated mobile number for the claims team	+91 95000 33445
Single Line	Policy_Number	Short free-text policy number	POL-2024-778812
Multi Line	Incident_Description	Description of the incident and circumstances	Vehicle damaged in a collision at the traffic signal near Anna Nagar.
Number	Claim_Amount_Requested	Numeric amount being claimed (positive only)	45000
Date	Date_Of_Incident	Date the incident occurred (date picker)	15-Jul-2026
Time	Preferred_Callback_Time	Preferred slot for callback from the claims officer	4:00 PM
Drop Down	Claim_Type	Single-select list of insurance categories	Motor Insurance
Radio	Claimant_Type	Mandatory single choice of claimant category	Policyholder
Multi Select	Supporting_Documents_Available	One or more supporting documents available	Photographs, Police FIR Copy, Repair Estimate
Checkbox	Declaration_Of_Authenticity	Declaration that the information is true	Checked (Agreed)

Form Layout (Section-wise)

Section	Fields
A – Claimant Details	Claimant Name (First, Last) · Claimant Type (Radio: Policyholder / Nominee / Third Party) · Policy Number (Single Line)
B – Contact Details	Email Address (Email) · Contact Number (Phone) · Residential Address (Address)
C – Claim Details	Claim Type (Drop Down) · Date of Incident (Date) · Claim Amount Requested (Number) · Supporting Documents Available (Multi Select) · Incident Description (Multi Line)
D – Scheduling & Declaration	Preferred Callback Time (Time) · “I declare that the information provided is true and accurate” (Checkbox)

Validation Rules to Configure

- Claimant Name, Phone, Policy Number, Claim Type, Date of Incident, Claim Amount and Declaration Checkbox are **mandatory**.
- Email field: built-in email format validation enabled.
- Phone field: country-code format enabled for Indian numbers.
- Number field (Claim_Amount_Requested): restrict to a positive value only.
- Date field: Date_Of_Incident must not allow future dates.
- Checkbox (Declaration): the form cannot be submitted unless it is checked.

Procedure

1 Log in to Zoho Creator and open the Insurance Claim Request application.
2 Create a new form named **Claim_Request_Form**.
3 Drag the 13 Basic Fields from the palette to the form and rename each as per the table.
4 Arrange the fields into Sections A to D.
5 Add the Drop Down choices (Motor, Health, Property, Life, Travel Insurance), Radio choices and Multi Select choices.
6 Configure the mandatory flags and validations listed above.
7 Create the report **Claim_Request_Report** and configure it to list all submitted claims.
8 Set up a Form Workflow (On Success) that e-mails an acknowledgement with a reference number to the Email_Address.
9 Open the live preview, submit at least three sample records and check the report.

Workflow Summary

1 Claimant opens the public form link shared on the insurer’s website or in the policy servicing e-mail.
2 Claimant fills in personal, policy, incident and scheduling details across the four sections.
3 On Submit, Zoho Creator validates all mandatory fields and formats.
4 A new record is created in the Claim_Request_Report.
5 An automated acknowledgement e-mail with a reference number is sent to the claimant.
6 The claims team reviews the report, filters by Claim Type and Claim Amount Requested, and assigns an investigator who calls the claimant at the Preferred Callback Time.

Sample Data to Enter (3 records)

#	Claimant	Type	Policy No.	Claim Type	Date of Incident	Amount (₹)	Callback
1	Lakshmi Narayanan	Policyholder	POL-2024-778812	Motor Insurance	15-Jul-2026	45000	4:00 PM
2	Rajesh Kumar	Nominee	POL-2025-114503	Health Insurance	10-Aug-2026	120000	11:00 AM
3	Meena Devi	Policyholder	POL-2023-562190	Property Insurance	02-Sep-2026	85000	3:30 PM

These are fictitious sample values for testing only.

Output (Screenshots)

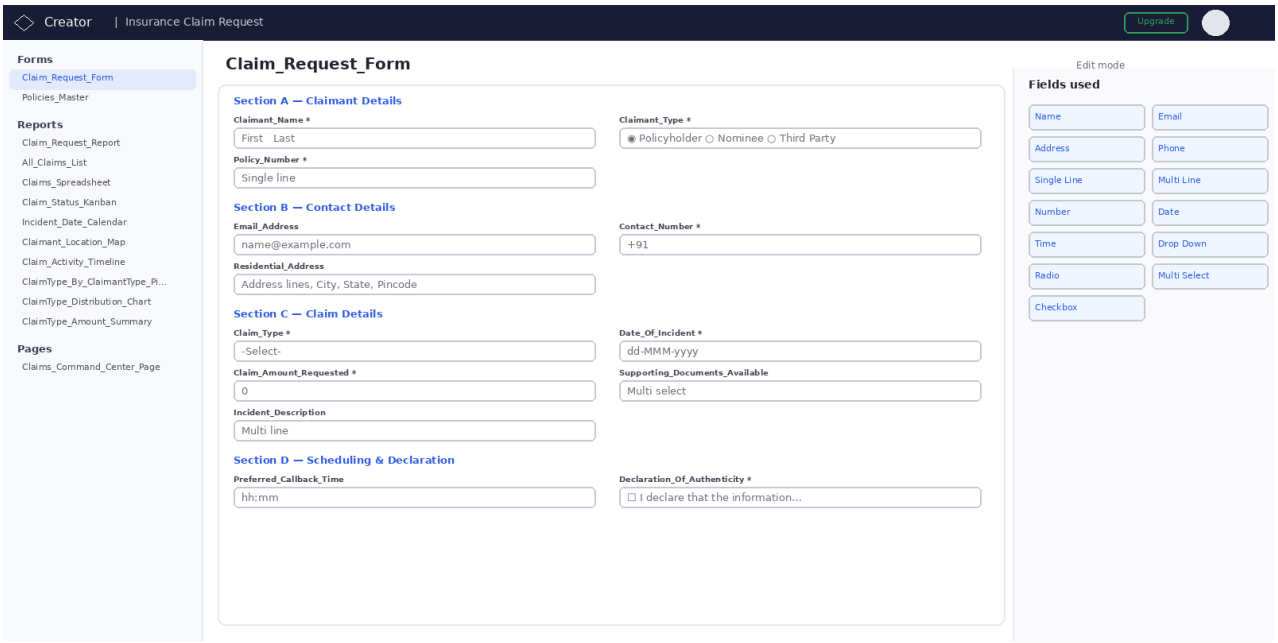

Figure 4A-1 – (a) Form Builder – Claim_Request_Form with all 13 Basic Fields (reference mockup)

(b) Live preview of the form

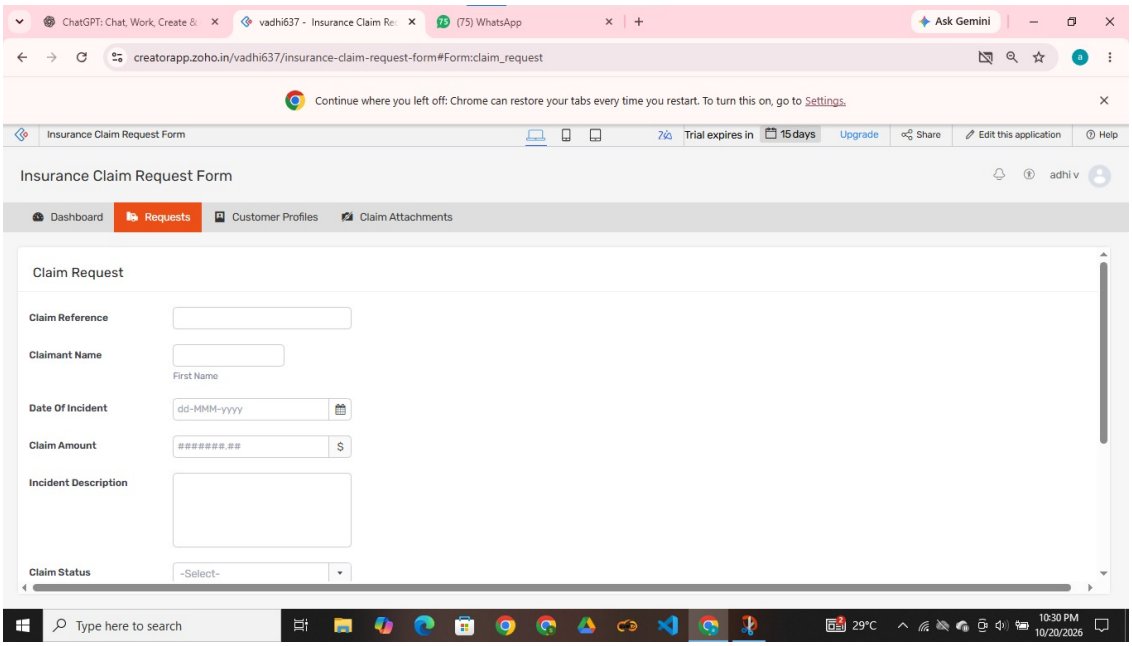

Figure 4A-2 – (b) Live preview of the form (screenshot from my Zoho Creator application)

(c) Claim_Request_Report with at least three submitted records

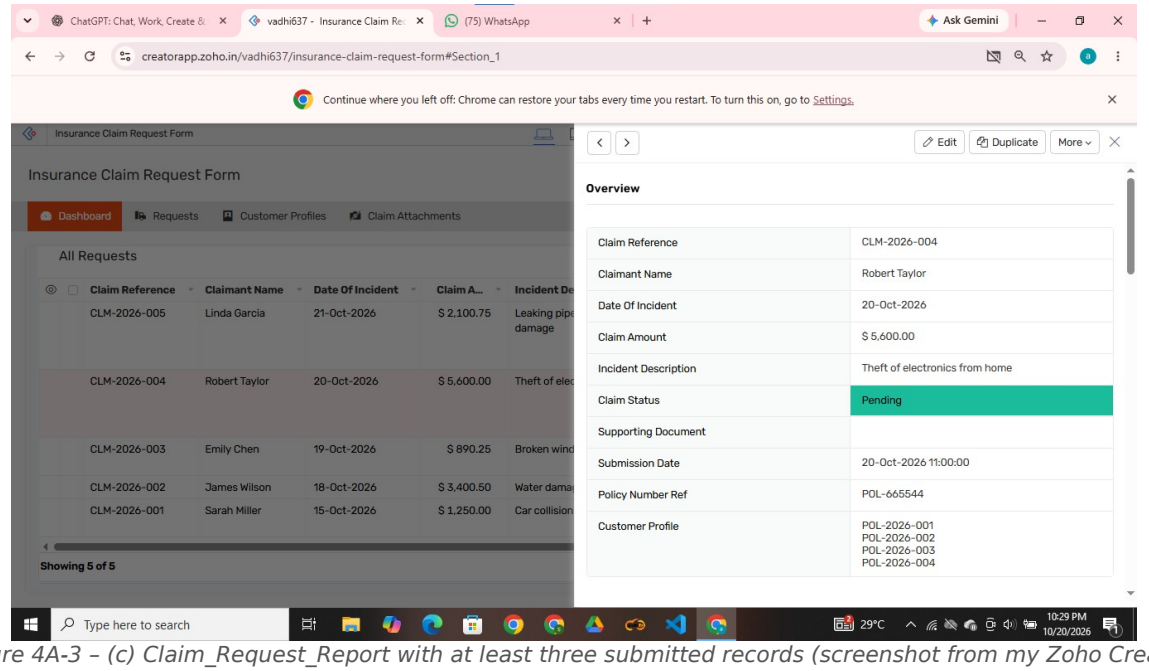

Figure 4A-3 – (c) Claim_Request_Report with at least three submitted records (screenshot from my Zoho Creator application)

(d) Acknowledgement e-mail received by the claimant

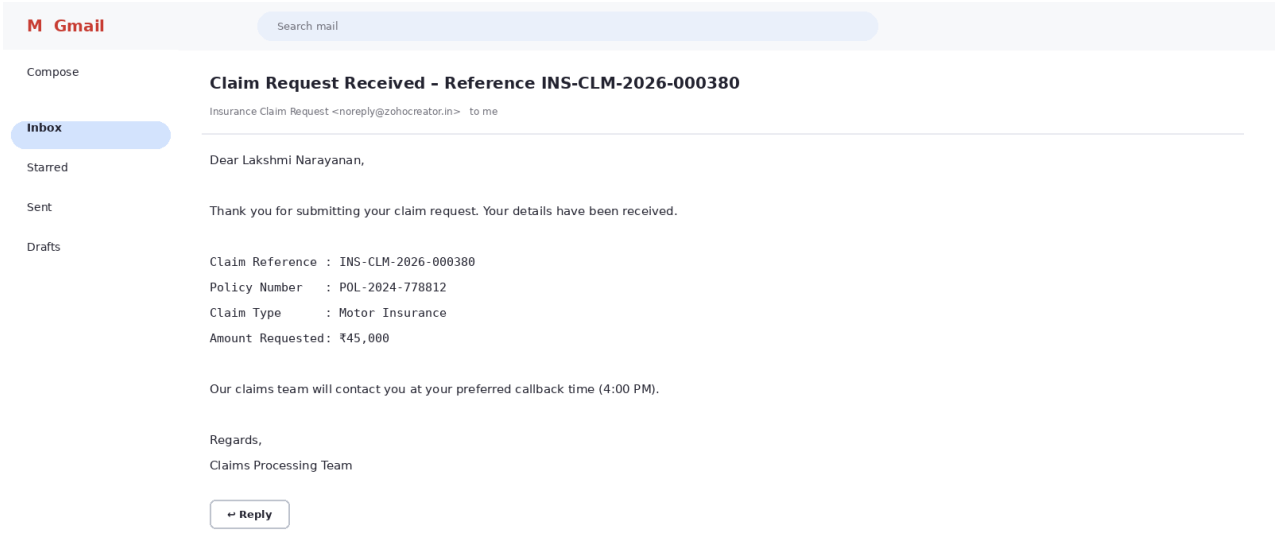

Figure 4A-4 – (d) Acknowledgement e-mail received by the claimant (reference mockup)

Result

The Insurance Claim Request Form was successfully designed in Zoho Creator using all 13 Basic Fields, with the required validations and the Claim_Request_Report workflow.

Experiment 4B

Insurance Claim Request Form – Advanced Fields
Application: Insurance Claim Request & Processing Management

Aim

To extend the Insurance Claim Request Form in Zoho Creator using the 17 Advanced Fields available in the Form Builder, so that the form supports policy verification, witness capture, settlement computation and automatic claim-reference/QR generation.

Fields Used (17 Advanced Fields)

Field Type	Field Name	Purpose	Sample Value / Behaviour
Decision Box	Is_Third_Party_Involved	Yes/No: was a third party involved	Yes / No toggle
Rich Text	Claim_Process_Guidelines_Display	Formatted claim-process guidelines shown inside the form	“Keep all original bills... Do not repair the vehicle before inspection.”
URL	FIR_Copy_Online_Link	Link to an online copy of the police FIR	https://efir.tnpolice.gov.in/case/88231
Image	Damage_Photo	Photo of damaged property or vehicle	damage_photo_01.jpg
Percent	Depreciation_Percent	Depreciation as per policy terms	20%
Currency	Estimated_Repair_Cost	Estimated repair/replacement cost (₹)	₹38,000.00
Decimal	Policy_Sum_Insured_Lakhs	Sum insured in lakhs, to check claim against limit	5.50
Date-Time	Claim_Submitted_On	Auto-records date and time of submission	24-Jul-2026 16:20
SubForm	Witness_Details	Repeating rows: witness name, contact, statement	Mohan K. – 9876543210 – saw the collision
Lookup	Policy_Details_Lookup	Auto-fills coverage type, sum insured and validity from the master Policies form	POL-2024-778812 – Comprehensive – valid till 31-Mar-2027
Signature	Claimant_Digital_Signature	Digital signature confirming the declaration	Drawn signature
File Upload	Repair_Estimate_Upload	Scanned garage estimate or medical bill	repair_estimate.pdf
Audio	Incident_Voice_Statement	Optional short voice statement	voice_statement_01.mp3 (0:35)
Video	Accident_Scene_Video	Short video of accident scene for the surveyor	accident_scene.mp4 (0:50)
Auto Number	Claim_Reference_ID	Unique sequential claim reference	INS-CLM-2026-000384
Formula	Net_Payable_Amount	Net settlement after depreciation and deductible	see formula below
QR/Barcode	Claim_Tracking_QR_Code	QR code encoding the Claim Reference ID	QR image of INS-CLM-2026-000384

Extended Form Layout (Section-wise)

Section	Fields
E – Policy Verification & Evidence	Policy Details Lookup · Damage Photo · Repair Estimate Upload · Policy Sum Insured in Lakhs
F – Witness & Media Details	Witness Details (SubForm) · FIR Copy Online Link · Accident Scene Video (optional) · Incident Voice Statement (optional)
G – Settlement Computation	Is Third Party Involved · Estimated Repair Cost · Depreciation Percent · Net Payable Amount (read-only)
H – Declaration & System Values	Claim Process Guidelines (Rich Text) · Claimant Digital Signature · Claim Submitted On · Claim Reference ID · Claim Tracking QR Code

Validation & Configuration Rules

- **Lookup** (Policy_Details_Lookup): connected to the master *Policies_Master* form; staff use type-ahead search instead of free text.
- **SubForm** (Witness_Details): minimum 0, maximum 4 rows per claim.
- **File Upload**: PDF, JPG, PNG only; maximum 5 MB.
- **Image**: JPG and PNG only; maximum 2 MB.
- **Video**: maximum duration 60 seconds and 50 MB.
- **Percent**: value range 0 to 50.
- **Currency**: non-negative values only, formatted in INR (₹).
- **Formula**: read-only, recalculated automatically when Estimated_Repair_Cost or Depreciation_Percent changes.
- **Auto Number**: prefix “INS-CLM-”, current year and a 6-digit auto-incrementing sequence.
- **QR/Barcode**: generated immediately after the Claim Reference ID is assigned on submission.
- **Signature** and **Decision Box** are mandatory.

Formula – Net Payable Amount

```
Net_Payable_Amount = Estimated_Repair_Cost
                   - (Estimated_Repair_Cost * Depreciation_Percent / 100)
                   - Policy_Deductible

Example: 38000 - (38000 * 20 / 100) - 2000 = 38000 - 7600 - 2000 = Rs. 28,400
```

Note: **Policy_Deductible** is not one of the 17 Advanced Fields. Add it as a Currency field on Policies_Master and bring it into the claim form through the Lookup, or add it as a normal Currency field. Divide by 100 if the Percent field stores 20 for 20%.

Procedure

1 Open the Insurance Claim Request application and edit **Claim_Request_Form** (built in Experiment 4A).
2 Create the master form **Policies_Master** with a few sample policies.
3 Add Sections E to H and drag the 17 Advanced Fields into them.
4 Configure the Lookup, SubForm, file-type and size restrictions, and the Percent and Currency ranges.
5 Configure the Auto Number (prefix, year, 6 digits) and the QR/Barcode field.
6 Add the Net_Payable_Amount formula and set it read-only.
7 Mark Signature and Decision Box as mandatory.
8 Preview the form, add witness rows, and submit at least two sample records.
9 Add the new columns (computed amount, Claim Reference ID, QR code) to the Claim_Request_Report.

Workflow Summary

1. Claimant completes the basic-field sections (personal, contact, claim details).
2. Claims staff verify policy details with the Lookup, which auto-fills coverage type, sum insured and validity.
3. Witnesses, if any, are added as rows in the Witness Details SubForm.
4. Claimant uploads the damage photo, repair estimate and optionally a video and a voice statement.
5. Claimant states whether a third party was involved; repair cost, depreciation and the computed Net Payable Amount are displayed.
6. Claimant reads the guidelines block and signs digitally.
7. On Submit, the system generates the Claim Reference ID, time-stamps the claim and creates the QR code.
8. The claims team reviews the report, verifies documents and witness statements, and uses the QR code for tracking at branch counters.

Output (Screenshots)

Result

The Insurance Claim Request Form was extended with all 17 Advanced Fields, including Lookup-based policy verification, a witness SubForm, an automatic Net Payable formula, a Claim Reference ID and a QR code for tracking.
